Preface .....	vii
1. Introduction .....	1
1.1 Metals .....	5
1.2 Ceramics .....	6
1.3 Inorganic Glasses .....	6
1.4 Polymers .....	6
1.5 Semiconductors .....	7
2. Atomic Bonding in Solids .....	9
2.1 Electron States in Atoms .....	11
2.1.1 Quantum States and the Periodic Table .....	11
2.1.2 Electron Orbitals and Charge Distributions .....	14
2.2 Electron States and Bonding in Molecules .....	18
2.2.1 Atom-Atom Bonding in Molecules .....	18
2.2.2 Bonding between Molecules .....	20
2.3 Atom-Atom Bonding in Solids .....	20
2.3.1 Generic Features of Atom-Atom Bonding in Solids .....	20
2.3.2 Atom-Atom Bonding in Different Types of Solids .....	24
3. Structure of Solids .....	30
3.1 Structure and Properties: A First Glimpse .....	32
3.2 Crystals and Unit Cells .....	33
3.3 Close-packing of Atoms .....	34
3.4 Structure of Metals .....	37
3.4.1 Face-centered Cubic Structure .....	37
3.4.2 Hexagonal Close-packed Structure .....	40
3.4.3 Body-centered Cubic Structure .....	41
3.5 Structure of Ceramics .....	43
3.5.1 Rules for Building Ceramic Structures .....	43
3.5.2 Examples of Ceramic Structures .....	45
3.6 Structure of Covalent Crystals .....	49
3.6.1 Diamond and Silicon .....	49
3.6.2 Other Forms of Carbon .....	49

3.6.3 Silicon Dioxide .....	50
3.7 Structure of Inorganic Glasses .....	52
3.7.1 Overview of Glasses .....	52
3.7.2 Silicate Glasses .....	53
3.8 Structure of Polymers .....	56
3.9 Crystal Geometry and Solid Structure .....	59
3.9.1 Atom Positions and Crystal Directions .....	59
3.9.2 Crystal Planes and Miller Indices .....	61
3.9.3 Additional Properties of Crystal Planes .....	64
3.10 Structure Determination by X-ray Diffraction .....	66
3.10.1 Principles of X-ray Diffraction .....	66
3.10.2 X-ray Diffraction of Simple Metals .....	69
3.10.3 X-ray Diffraction of Ceramics .....	72
3.10.4 Small Particles, Surfaces, and Amorphous Materials .....	74
3.11 Structure and Properties: A Second Glimpse .....	77
4. Defects in Solids .....	84
4.1 Overview of Crystal Imperfections .....	86
4.2 Point Defects in Metals .....	89
4.2.1 Vacancies in Metals .....	89
4.2.2 Impurities in Metals .....	91
4.3 Point Defects in Ceramics .....	94
4.3.1 Vacancies in Ceramics .....	94
4.3.2 Impurities in Ceramics .....	95
4.4 Impurities in Covalent Crystals .....	96
4.5 Dislocations in Metals .....	97
4.5.1 Edge Dislocations .....	95
4.5.1 Screw Dislocations .....	99
4.6 Area Defects in Metals .....	100
4.6.1 Grain Boundaries in Metals .....	100
4.6.2 Stacking Faults in Metals .....	102
4.7 Structure and Properties: A Third Glimpse .....	102
5. Mechanical Properties .....	106
5.1 Macroscopic Phenomena: Stress and Strain .....	108
5.2 Stress vs. Strain Curves: Elastic Deformation .....	110
5.3 Inelastic Deformation: Yielding and Ductility .....	113
5.4 Mechanical Properties of Materials .....	117

5.4.1	Generic Properties	117
5.4.2	Mechanical Properties of Metals	120
5.4.3	Mechanical Properties of Ceramics	123
5.4.4	Mechanical Properties of Polymers	124
5.5	Atomic Models of Mechanical Behavior	129
5.5.1	Elastic Deformation: Mainly Metals	129
5.5.2	Plastic Deformation in Metals	133
5.5.3	Elastic and Plastic Deformation in Ceramics	141
5.5.4	Elastic and Plastic Deformation in Polymers	141
5.6	Fracture	144
5.6.1	Ductile Fracture	144
5.6.2	Brittle Fracture	145
5.6.3	Comments on Fracture	152
5.7	Strengthening of Materials	153
5.7.1	Strengthening of Metals	153
5.7.2	Strengthening of Ceramics and Glasses	161
5.7.3	Strengthening of Polymers	163
6.	Diffusion	171
6.1	Description of the Process and Mechanisms	173
6.2	Fick's First Law: Steady-State Diffusion	176
6.3	Fick's Second Law: Non-Steady-State Diffusion	181
6.3.1	Carburizing: An Approximate Solution	181
6.3.2	Carburizing: The Exact Solution	184
6.3.3	Carburizing: Numerical Examples	187
6.3.4	More on Non-Steady-State Diffusion: Drive-In	191
6.3.5	Concluding Remarks on Diffusion: Drive-In	193
7.	Phase Changes	197
7.1	Phases of Materials	199
7.2	The Generic One-Component Phase Diagram	201
7.3	Examples of One-Component Phase Diagrams	203
7.4	The Gibbs Phase Rule	204
7.5	Phase Changes: Melting and Solidification	205
7.5.1	Melting of Crystalline Solids	205
7.5.2	Melting of Amorphous Solids	207
7.5.3	Solidification: Amorphous Solids	212
7.5.4	Solidification: Crystalline Solids	212

8. Phases and Microstructure .....	232
8.1 Two-Component Phase Diagrams: Generic Issues .....	234
8.2 Binary Isomorphous System: Complete Solid Solubility .....	237
8.2.1 Cu-Ni Phase Diagram .....	237
8.2.2 Tie Line and Lever Rule .....	239
8.2.2 Microstructure Development .....	241
8.3 Binary Eutectic System: Partial Solid Solubility .....	243
8.3.1 Cu-Ag Phase Diagram .....	243
8.3.2 Amounts of Phases .....	245
8.3.2 Microstructure Development .....	247
8.4 Other Binary Systems .....	251
8.4.1 The Pb-Sn system .....	251
8.4.2 The Cu-Zn system .....	252
8.4.3 The NiO-MgO system .....	253
8.4.4 The SiO <sub>2</sub> -Al <sub>2</sub> O <sub>3</sub> system .....	253
8.5 The Fe-C System: Kinetics of Phase Transformation .....	255
8.5.1 The Fe-C Phase Diagram .....	255
8.5.2 Equilibrium Microstructures .....	257
8.5.3 Kinetics of Phase Transformation: TTT Diagrams .....	260
8.6 Comments on TTT Diagrams and Microstructure .....	268
8.7 Summary: Phase Diagrams and Phase Transformations .....	273
9. Metal Alloys .....	281
9.1 Ferrous Alloys .....	283
9.1.1 Overview .....	283
9.1.2 Plain Carbon Steels .....	286
9.1.3 Low-Alloy Steels .....	286
9.1.4 Stainless Steels .....	287
9.1.5 Cast Irons .....	288
9.1.6 Alloying Elements and Microstructure .....	289
9.1.7 Steels at Low Temperature: The Ductile-to-Brittle Transition ..	293
9.2 Non-Ferrous Alloys .....	295
9.2.1 Copper Alloys .....	296
9.2.2 Aluminum Alloys .....	297
10. Ceramics and Glasses .....	303
10.1 Phase Diagrams and Microstructure of Ceramics .....	305

10.2	Ceramics, Glasses, and Crystallization	307
10.3	Glass-Ceramics	310
10.4	Engineering Ceramics	310
10.4.1	General Background	310
10.4.2	Oxide Ceramics	312
10.4.3	Non-Oxide Ceramics	316
11.	Polymers	322
11.1	Classification of Polymers	324
11.2	Chemistry of Polymer Molecules	326
11.2.1	Polymerization by Addition: Polyethylene	326
11.2.2	Polymerization by Condensation: Polyester	327
11.3	Geometrical Aspects of Polymer Molecules	328
11.4	Size Distribution of Polymer Molecules	331
11.5	Material Properties and Applications	334
11.5.1	Molecular Weight Effects	334
11.5.2	Material Properties and Uses	336
12.	Electronic Properties	348
12.1	The Two Forms of Ohm's Law	350
12.2	Atomic Level Picture of Electrical Conductivity	352
12.3	Electron States and Energy Bands in Solids	355
12.4	Conduction in Metals: Influences on Electron Mobility	359
12.4.1	Dependence of Resistivity on Temperature	359
12.4.2	Dependence of Resistivity on Impurities	360
12.4.2	Dependence of Resistivity on Deformation-Induced Defects	361
12.5	Semiconductors	362
12.5.1	The Fermi-Dirac Distribution	362
12.5.2	Bands and Bonds in Semiconductors	364
12.5.3	Intrinsic Semiconductors: Free Electrons and Holes	365
12.5.4	Extrinsic Semiconductors: Doping	369
12.6	Dielectrics, or Insulators	374
12.6.1	Optical Properties	374
12.6.2	Electrical Capacitance	376
12.7	Electronic Devices	381
12.7.1	Single-Material Devices	382
12.7.2	Two-Material Devices: Semiconductor Diodes	382
12.7.3	Three-Material Devices: The Bipolar Transistor	385

12.7.4	The MOSFET Transistor .....	382
13.	The Future of Materials .....	394
13.1	Microscopy of Materials at the Atomic Scale .....	396
13.1.1	Field Ion and Field Electron Emission Microscopy .....	397
13.1.2	Scanning Electron and Scanning Transmission Electron Microscopy .....	399
13.1.3	Atomic Force Microscopy .....	401
13.2	Nanoscale Materials - Size Effects .....	405
13.2.1	Surface vs. Bulk Atoms in Small Particles .....	405
13.2.2	The Shape of Small Particles .....	408
13.3	New Forms of Carbon .....	411
13.3.1	Graphene .....	411
13.3.2	Carbon Nanotubes .....	412
13.3.3	Nanocrystalline Diamond Films .....	416
13.4	Advanced Metals .....	418
13.4.1	Advanced Steels .....	418
13.4.2	Gum Metal .....	419
13.4.3	Metallic Glasses .....	420
13.5	Photonic Crystal Optical Fibers .....	423
13.6	New Electronic Materials .....	428
13.6.1	Bandgap Engineering of Semiconductors .....	428
13.6.2	Materials and the End of Moore's Law .....	420
13.7	Epilogue .....	434
	Key Words .....	440
